We understand that the Iowa Democratic Party is conducting a tally of paper records which will verify the results of the Caucuses held last night. We are confident that the results will reflect our internal data.

In the interest of the transparency we are making available Pete for America’s precinct-level data from over 1,200 precincts from last night’s Caucuses. Like other campaigns, these data are self-reported as part of the PFA Caucus night precinct captain procedure.

The data include precinct-level data that shows overall turnout, Pete support in first and second alignment as well as calculated state delegate equivalents.

**Topline Results:**

<table>
<thead>
<tr>
<th>Total Turnout</th>
<th>Buttigieg First Alignment</th>
<th>Buttigieg Final Alignment</th>
<th>Calculated SDE</th>
</tr>
</thead>
<tbody>
<tr>
<td>152,624</td>
<td>32,932 (22%)</td>
<td>37,667 (25%)</td>
<td>480.44 (28%)</td>
</tr>
</tbody>
</table>

Our precinct captains reported full caucus results in 1,259 precincts—this represents approximately 75% of the total precincts and just over 150,000 total votes. We have partial results for another 42 precincts.

We asked each of our precinct captains to report the following metrics:

- Precinct number
- Total turnout
- First Alignment for Pete
- Final Alignment for Pete
- County Delegates for Pete
We saw that turnout this year was in line with 2016 turnout and our first and final alignment numbers were around 22% and 25%, respectively. In calculating the State Delegate Equivalents from the final alignment numbers, we came in with 480.44 SDEs (28%) in the precincts that have reported.

The charts below show how we performed on SDEs across the state and the broad coalition Pete has continued to put together across geography, demographic group and voting history.

**Urbanity:**

![% SDE by Urbanity](image)

Pete captured nearly 40% of the delegates in suburban areas, over 30% in rural areas, and 21% in urban areas.
**2016 POTUS Choice**

Pete got over 35% of SDEs in precincts Clinton won in 2016 and 30% in precincts Trump won.

### SDE % by 2016 POTUS preference

- **Clinton ‘16**: 35%
- **Trump ‘16**: 31%

---

**Media Market**

Across the state, Pete showed a strong performance in **every** media market:

### SDE % by DMA

- **Cedar Rapids**: 26%
- **Davenport**: 35%
- **Des Moines**: 40%
- **Omaha**: 27%
- **Ottumwa**: 25%
- **Keokuk**: 38%
- **Mason City**: 31%
- **Sioux City**: 27%
Our data shows that Pete built a coalition that proves he is the best positioned to beat Donald Trump. Not only did he build a broad base of support geographically and demographically across the state, he also showed he can draw support in communities that voted for Obama in 2012 (and in many cases 2008) and then flipped to Trump in 2016. According to entrance polling as well, Pete came in first for caucusgoers who did not caucus in 2016 and he came in second only to Sanders with first time caucusgoers.
